REMARKS

The figures of births and deaths shown in this statement for week ending the 17th December, 1955, relate to 256 towns with an estimated population of 35,335 thousands. The total number of towns is 313 and their population is 40,934 thousands. Thus 82% of the total number of towns representing 86% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 22,459 and 8,327 representing birth and death rates of 33.1 and 12.9 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 216 towns with an estimated population of 29,007 thousands. Information about Ajmer, could not be included. The total number of towns is 252 and their population is 32,573 thousands. Thus 86% of the total number of towns representing 89% of the total population is covered. The number of births and deaths recorded in these

towns were 19,534 and 7,222 representing birth rates of 35.0 and 12.9 per thousand of population respectively. The table at the end gives the figures by States.

No town recorded a high death rate of 50 or over per thousand of population.

(B) States (Part B).—The data here relate to 40 towns with an estimated population of 6,328 thousands. The number of towns is 61 and their population is 8,362 thousands. Thus 66% of the total number of towns representing 76% of the total population is covered. The number of births and deaths recorded in these towns were 2,925 and 1,105 representing birth and death rates of 24.0 and 9.1 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
